

innovation, style, strength

Just launched at the Auckland Home Show this year, the Hideaway Soft Close bin is an innovative new product from Kitchen King, the leaders in hidden bin solutions for New Zealand homes.

The new product has several advantages, including soft round corners and antibacterial powder coating, which works effectively against harmful strains of bacteria, yeast and fungi, making it an ideal product for the kitchen, laundry or bathroom.

Once closed, the foam-sprung friction lid creates a perfect seal across the bin,

which helps to control odours. Intelligently designed, this New Zealand made quality space-saving solution is also perfect for recycling and gets the thumbs up from the ESSENTIALLY HOME team.

The Hideaway Soft Close bins are available in 15 or 20 litre buckets, and come in standard white or ghost grey. The powder coated steel frame is easy to clean and offers superior strength and durability.

All models support up to 45kg of weight and come complete with tracks

that allow the buckets to be easily removed from beneath the bench top.

German-made Schock tracks with ball bearing runners create a controlled close, also fitted with an air vacuum dampener that protects the unit from slamming.

It's all in the detail, making the Hideaway Soft Close bins the perfect complement for the modern home. Kitchen King is a member of the National Kitchen and Bathroom Association and all Hideaway bins come complete with warranties.

neat
thinking

Clean, simple, and versatile Hideaway Bins from Kitchen King are the ideal solution to keep the bin out of sight in any area of a home - kitchen, laundry, bathroom... anywhere. Simple to incorporate into new or existing homes, and commercial projects.
