

The Hideaway® Deluxe Floor Mount Installation Instructions

Step 1 - Unpack Hideaway Bin

- Remove all polystyrene.
- Please leave the Glad Sample Pack and instructions inside the bucket for owner.

Step 2 - Install perfume sachet into the friction fitted lid

- With the bin standing on the floor mount brackets, fully extend the tracks and remove the buckets - set aside in a safe place.
- Close the tracks fully.
- For ease of use, turn the top mounting panel upside down so the inner contents of the bin are facing upwards.
- Remove the perfume sachet from its check out in the friction fitted lid.
- Unwrap the plastic from the perfume sachet and place the perfume sachet back into the check out in the lid.
- Ensure the perfume sachet is sitting flush in the check out - if it is not, it will interfere with the bucket/s.

Step 3 - Install the floor mount bin within the cupboard

- Once again, turn the Hideaway Bin over to rest on floor mount brackets.
- Place the unit inside cabinet in desired location (ideally place the bin in the centre of the space provided). Secure to base of cabinet using screws provided - 8 x 20mm sure fix screws into mounting holes provided. Mounting holes are located at the base of the floor mount brackets.

FLOOR MOUNT HANDLE PULL MODELS MOVE TO STEP 5

FLOOR MOUNT DRAWER PULL MODELS FOLLOW STEPS 4 & 5

Step 4 - Floor mount drawer pull models only: fix cabinet fascia to door bracket of bin

- Place a 4mm self tapping screw into the centre hole of the door bracket - ensure the point of the screw is only protruding approx 3mm.
- With the bin closed fully, align the front fascia of the cupboard against the door bracket. A small hit with your hand to the location of the screw will help provide a drilling indication.
- Lie cabinet fascia on a flat surface with the internal part of the door facing upwards.
- Remove the inner track with collar and door bracket attached: (refer fig 2a & 2b)

Fully extend the tracks.

Find the black levers located on the outer side of both the left and right track.

Simultaneously, push the left lever up and the right lever down and pull inner of the tracks towards you until it separates completely from the unit. Set track inner (with collar and door bracket attached) aside in a safe location.

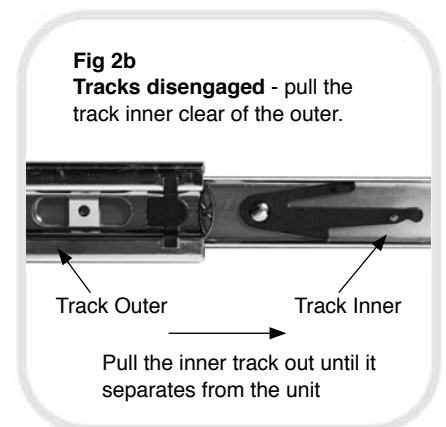

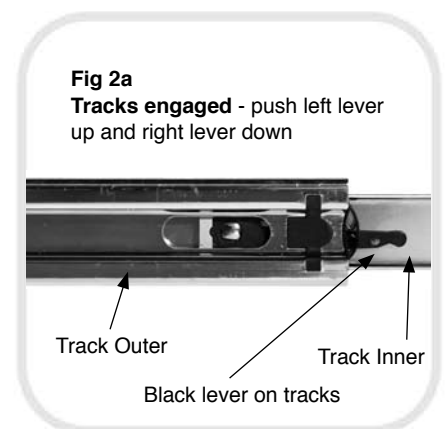

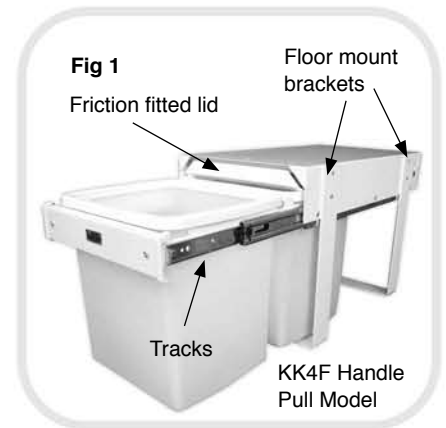

Push the outer tracks attached to the top mounting panel back inside the unit.

- Align the door bracket with the drilling mark on your cabinet fascia. Drill and tighten centre screw, fixing the door bracket of the bin to the cabinet fascia.
- Reattach the track inner (with collar and door bracket) to the track outer on the floor mount bin (now installed in your cupboard):

Ensure the tracks attached to the top mounting panel are pushed all the way inside the unit. On these outer tracks ensure the inner slider is pulled all the way towards the front of the unit.

Line up the inner tracks (with collar and door bracket) to the outer tracks attached to the floor mount bin.

Push the tracks all the way in until the unit closes to engage the tracks. Pull the unit open again. The tracks should move with ease indicating correct positioning.

- Check positioning and align, proceed to marking, screwing and tightening the six remaining screws. Vertical and horizontal adjustment is provided on the door bracket.

Step 5 - Place bin buckets into checkouts on collar

- Fully extend the tracks.
- Place buckets into the checkouts provided on the collar of the unit. If the buckets do not sit within these checkouts the unit will not close properly.
- **Trade** - please leave the Glad sample pack inside the bucket.
- **Homeowner** – you will find a Glad sample pack in the base of your bucket. Slide the Glad Kitchen Tidy Bags into your buckets ensuring the bags will not interfere with the tracks (NZ only).
- Place liner holders on top of buckets.

Installation complete!
